

# KSI Automated DI Water Refill Unit

The new DI water refill unit reduced in combination with the standart mounted automatic filter system the maintenance of a KSI SAM to an absolute minimum.

## Key features

- Available for all KSI SAM systems
- Retrofitable for all delivered systems, including all semi and fullautomated systems
- Full automated water level monitoring in the water tank
- Independent and accurate refilling
- Consumption reduction through selective refilling
- Integration of state of the art filters
- Designed for Cleanrooms
- Robust construction
- Equipped with all safety installations necessary for production environments
- Easy to use
